Sun, 16 Dec 2018 05:27:00 GMT conservation of momentum and collision pdf - Momentum is a measurable quantity, and the measurement depends on the motion of the observer. For example: if an apple is sitting in a glass elevator that is descending, an outside observer, looking into the elevator, sees the apple moving, so, to that observer, the apple has a non-zero momentum. McNally, ACTAR McNally and Associates Accident Reconstruction Services, LLC Fri, 14 Dec 2018 03:13:00 GMT Motorcycle Speed Estimates Using Conservation of Linear ... - Angular momentum is a vector quantity (more precisely, a pseudovector) that represents the product of a body's rotational inertia and rotational velocity about a particular axis. However, if the particle's trajectory lies in a single plane, it is sufficient to discard the vector nature of angular momentum, and treat it as a scalar (more precisely, a pseudoscalar).
